PROSTHETICS AND ORTHOTICS

About us

Osteon is a trusted provider of advanced prosthetic and orthotic care, dedicated to restoring mobility, independence, and quality of life. By combining medical expertise with innovative technology, we design solutions that feel natural, comfortable, and precisely tailored to each individual.

We support people of all ages, from children with congenital conditions to adults recovering from trauma or managing complex medical challenges. At every stage, our team offers personalized guidance, compassionate, patient-centered care, and unwavering support.

Our Vision

We empower people with mobility challenges. We restore comfort, confidence, and independence. Our solutions combine advanced technology with compassionate, patient-centered care.

Our Mission

Mobility challenges should never limit human potential. We aim to set new standards in prosthetic and orthotic care. We believe in dignity, confidence, and freedom of movement.

PROSTHETICS AND ORTHOTICS

Why Patients Trust Us

Care That Goes Beyond the Device

At Osteon, trust is built through understanding, listening, and ongoing support. We take the time to know each patient's challenges, goals, and daily realities before designing a solution. Our prosthetic and orthotic care is guided by clinical expertise, innovative technology, and a deep commitment to patient well-being.

What we deliver is not just a device, but lasting comfort, reliable performance, and renewed confidence to move freely. By standing beside our patients at every step, we help them achieve independence and a better quality of life today and in the years ahead.

Osteon.
PROSTHETICS AND ORTHOTICS

Lifelong Support and Ongoing Care

Your needs evolve over time, and your device should evolve with you. Through regular check-ups, we fine-tune the fit, alignment, and comfort to ensure optimal performance as your body adapts.

Our dedicated service team is always available to provide adjustments, upgrades, and repairs, minimizing downtime and maximizing reliability. At Osteon, our commitment goes beyond delivery. We stand by you throughout your journey, every step of the way.

Osteon.
PROSTHETICS AND ORTHOTICS

Empowering Patients Through Value-Based Care

We are committed to providing the right solution at the right cost without compromising quality or outcomes. Every recommendation is made with careful consideration of effectiveness, comfort, durability, and long-term sustainability.

Our goal is to deliver solutions that are not only clinically sound, but also practical, affordable, and built to reliably support you for years to come.

LOWER EXTREMITY
PROSTHETICS

BELOW-KNEE PROSTHESIS
TT (TRANSTIBIAL)

Osteon
PROSTHETICS AND ORTHOTICS

Removable, washable inner liner

Acts as an interface and protects the residual limb and skin

Custom-made carbon fibre socket

Grips the residual limb, redistributes load, and provides a base for component attachment

Pin-lock suspension system

Advanced suspension systems like this secure the prosthesis to the residual limb

Pylon Tube

acting as a rigid, load-bearing shaft between the socket and the foot to support walking

Foot

Provides a base of support while standing. Depending on the design, it absorbs shock, returns energy, and allows a natural walking pattern.

ABOVE-KNEE PROSTHESIS TF (TRANSFEMORAL)

Removable, washable inner liner

Acts as an interface and protects the residual limb and skin

Custom-made carbon fibre socket

Grips the residual limb, redistributes load, and provides a base for component attachment

Vacuum-based suspension system with liner

Advanced suspension systems like this securely attach the prosthesis to the residual limb

Functional Adaptors

Assist in daily life
e.g. cross-legged sitting

Prosthetic Knee Joint

Replaces knee function by providing mobility and safety according to user requirements

Pylon Tube

acting as a rigid, load-bearing shaft between the socket and the foot to support walking

Prosthetic Foot

Provides a base of support while standing. Depending on the design, it absorbs shock, returns energy, and allows a natural walking pattern.

Osteon
PROSTHETICS AND ORTHOTICS

UPPER EXTREMITY PROSTHETICS

BELOW-ELBOW PROSTHESIS TR (TRANSRADIAL)

Electrode

Sensors that capture muscle signals to trigger motion.

Shell

A protective outer layer for internal electronics.

Socket

Custom-molded for a secure, comfortable fit.

Battery

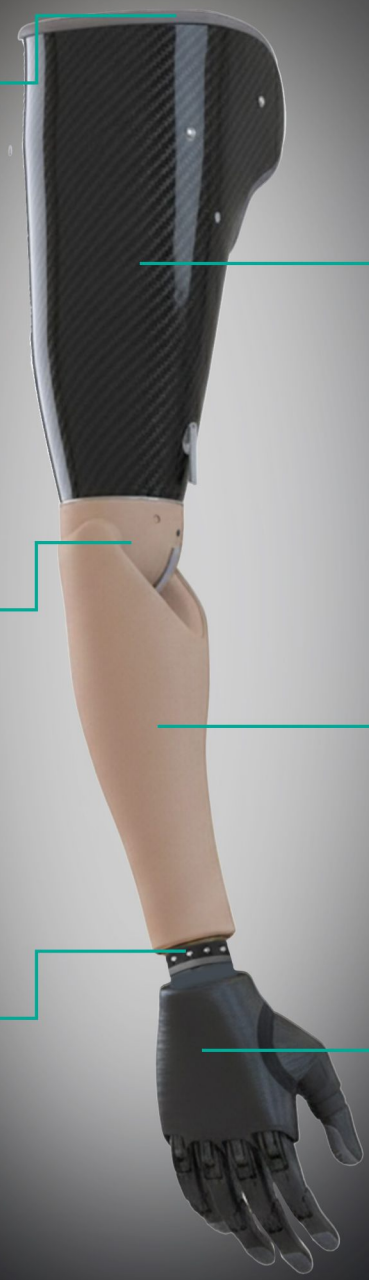

Provides reliable power for all-day performance.

Terminal Device

The functional hand unit used for grasping.

ABOVE-ELBOW PROSTHESIS TH (TRANSHUMERAL)

Osteon. PROSTHETICS AND ORTHOTICS

Electrode

Sensors that capture muscle signals to trigger motion.

Socket

The custom-molded interface for a secure and comfortable fit.

Electric motor

The power source for mechanical movement.

Elbow and hand circuit

The electronic system coordinating the elbow and hand.

Friction wrist

Enables rotation to position the hand for specific tasks.

Bionic hand

The functional device for grasping and manipulating objects.

SILICONE PROSTHETICS

Silicone Nose

Silicone nasal prosthetics restore natural shape and facial harmony. Custom-made for a lifelike look and comfortable fit.

Silicone Ear

Silicone ear prosthetics recreate natural contours and skin tone. Designed for realism, comfort, and secure wear.

Silicone Arm

Silicone prosthetic arms provide a natural appearance with smooth skin texture. Crafted for comfort, confidence, and daily use.

Silicone Feet

Silicone foot prosthetics restore shape and balance with a realistic finish. Designed for comfort, stability, and natural movement.

Silicone Finger

Silicone fingers are custom-made to match natural skin tone and texture. They restore appearance and confidence with a comfortable fit.

Osteon
PROSTHETICS AND ORTHOTICS

PREMIUM ORTHOTICS

Premium carbon fibre orthotics are designed to provide the highest level of support while remaining lightweight and comfortable. These orthoses are engineered with high-performance carbon fibre, providing superior strength, elasticity, and energy return, which enhance stability, alignment, and overall mobility. They provide a dynamic response that aids natural movement patterns, allowing easier walking and reducing effort in daily routines. Carbon fibre orthotics are designed to improve balance, reduce strain, and facilitate efficient gait. Lightweight construction ensures the device remains reliable over the long term. They are suitable for individuals with lower-limb conditions involving the nervous system, muscles, or other complex medical conditions. These orthoses help individuals become more independent, confident, and able to move more easily in their daily lives.

LOWER EXTREMITY
ORTHOTICS & SUPPORTS

Osteon. PROSTHETICS AND ORTHOTICS

Supportive leg braces are designed to provide stability and proper alignment, helping people move safely. They make walking and standing more comfortable and give greater confidence in daily activities.

AFO

AFOs support the ankle and foot to improve walking stability. They help manage foot drop and promote smoother movement.

KAFO

KAFOs provide support to the knee, ankle, and foot for better control and balance. They help reduce knee instability during walking.

HKAFO

HKAFOs support the hip, knee, ankle, and foot for improved posture and mobility. They offer stronger stability for complex lower-limb conditions.

THKAFO

THKAFOs provide full lower-limb and trunk support for maximum stability. They help improve standing balance and support assisted walking.

FOOT & ANKLE

Foot and ankle orthotics are designed to improve support, alignment, and stability during walking and standing. They help reduce pain and make daily movement more comfortable and confident.

Insole

Insoles provide cushioned support and help distribute pressure evenly across the foot. They reduce foot strain and improve comfort during daily activities.

University of California Biomechanics Laboratory (UCBL)

UCBL orthoses help control foot alignment and provide strong arch and heel support. They improve stability and reduce inward rolling of the foot.

Supramalleolar Orthosis (SMO)

SMOs provide gentle ankle support while improving foot positioning and balance. They are lightweight and ideal for better control during walking.

Charcot Restraint Orthotic Walker (CROW)

CROW walkers offer maximum support and protection for the foot and ankle. They reduce pressure and help in safe healing and long-term stability.

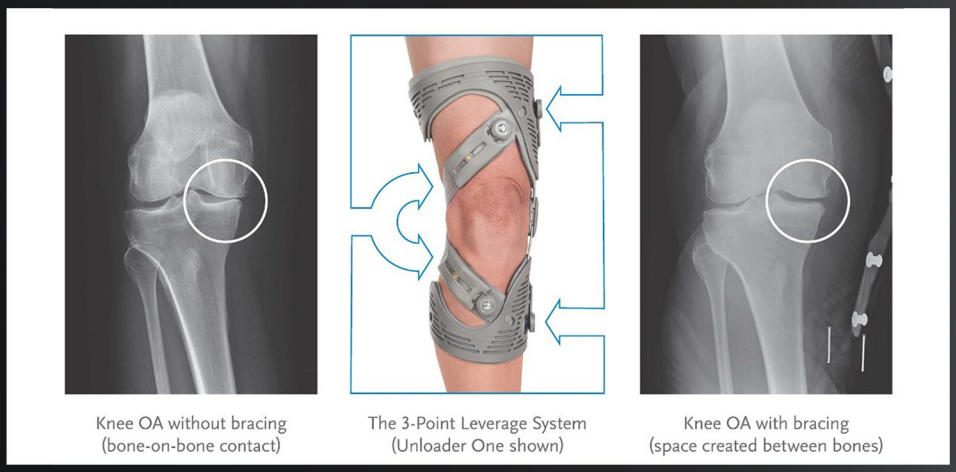

Osteon.
PROSTHETICS AND ORTHOTICS

UNLOADER ONE

The Unloader One OA Knee Brace uses dual Dynamic Force Straps (DFS) to apply a gentle force designed to reduce pressure on the sensitive bony surfaces of the knee, resulting in reduced pain and increased mobility for the wearer.

Osteon
PROSTHETICS AND ORTHOTICS

The 3 Point Leverage System

Knee OA without bracing (bone-on-bone contact) | The 3-Point Leverage System (Unloader One shown) | Knee OA with bracing (space created between bones)

Osteoarthritis & Ligament Knee Braces

Comprehensive range of products ranging from the clinically proven Unloader One OA knee braces to the most advanced knee braces for ligament instabilities.

Rehabilitative Products

Össur's rehabilitative braces, such as the premium-quality Rebound post-operative knee and elbow braces, are engineered to be durable, versatile, adjustable, and easy to apply.

KNEE BRACES

Knee braces are designed to reduce pain and improve knee stability during movement. They support the joint and help you walk, stand, and stay active with more confidence.

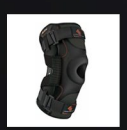

OA (Osteoarthritis) Brace

OA braces reduce pressure on the affected side of the knee and help ease pain while walking. They improve comfort and support better mobility in daily life.

ACL Brace

ACL braces provide support for the knee after injury or surgery. They help improve stability and protect the joint during movement.

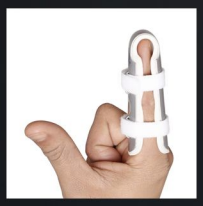

PCL Brace

PCL braces support the knee and help control backward movement of the tibia. They improve stability and promote safer walking and recovery.

UPPER EXTREMITY ORTHOTICS

Osteon. PROSTHETICS AND ORTHOTICS

Upper extremity orthotics support the hand, wrist, elbow, and shoulder to improve function and reduce pain. They help stabilize joints, improve movement control, and support recovery in daily activities.

Finger Orthoses

Finger orthoses support injured or weak fingers and help maintain proper alignment.

Cock-up Splint

Cock-up Splint provide support and positioning to improve hand function and comfort.

Wrist & Hand Orthoses (WHO)

WHO braces stabilize the wrist and hand to reduce pain and improve control.

Thumb Orthoses

Thumb orthoses support the thumb joint and reduce pain during gripping and pinching.

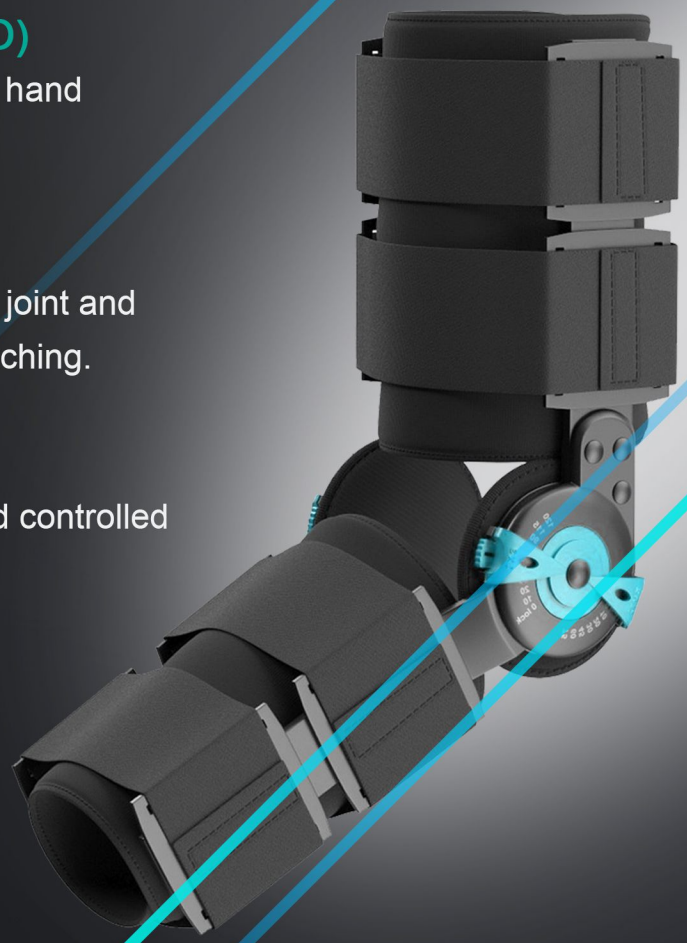

Elbow Orthoses

Elbow orthoses provide support and controlled movement for the elbow joint.

Shoulder Orthoses

Shoulder orthoses stabilize the shoulder and support proper positioning.

Back, Neck & Cervical Supports

Össur provides a host of back, neck, and cervical support technologies that you can trust, This includes products such as the Miami J Cervical Collar, which is scientifically designed to provide superior immobilization.

Miami J Cervical Collar
Miami J Select

- Post-trauma
- Stable cervical fractures
- Cervical spondylitis
- Cervical spondylosis
- RA and OA cervical spine

Universal Foam Cervical Collar

- Neck extension injuries (Whiplash)
- Cervical sprains and strains
- Cervical spondylosis
- Rheumatoid arthritis and osteoarthritis of the cervical spine
- Herniated cervical disc

Philadelphia Tracheotomy Collar

- Post-trauma
- Herniated cervical disc
- Cervical spondylosis
- Post-operative
- Cervical sprains and strains
- Motor neuron disease
- RA and OA cervical spine

Philadelphia Adjustable Collar

- Post-trauma
- Herniated cervical disc
- Cervical spondylitis
- Post-operative
- Cervical spondylosis
- RA and OA cervical spine

Miami Lumbar Posteo

- Back pain caused by stable vertebral compression fractures (VCF)

Miami JTO Thoracic Extension

Lower cervical spine disruptions

- Level I instability
- Isolated compression fractures
- Lateral mass fracture
- Spinous Process fracture

Upper C-Spine disruptions

- For increased stability over the collar alone
- Stable Jefferson or Hangman's Fracture
- Type I Odontoid Fracture

Miami TLSO 456

- Lumbar belt with added rigid panels and TLSO attachment
- Post-surgical immobilization
- Herniated disc
- Spondylolisthesis
- Spondylolysis
- Degenerative spine conditions
- Unstable and displared fractures
- Compression fractures

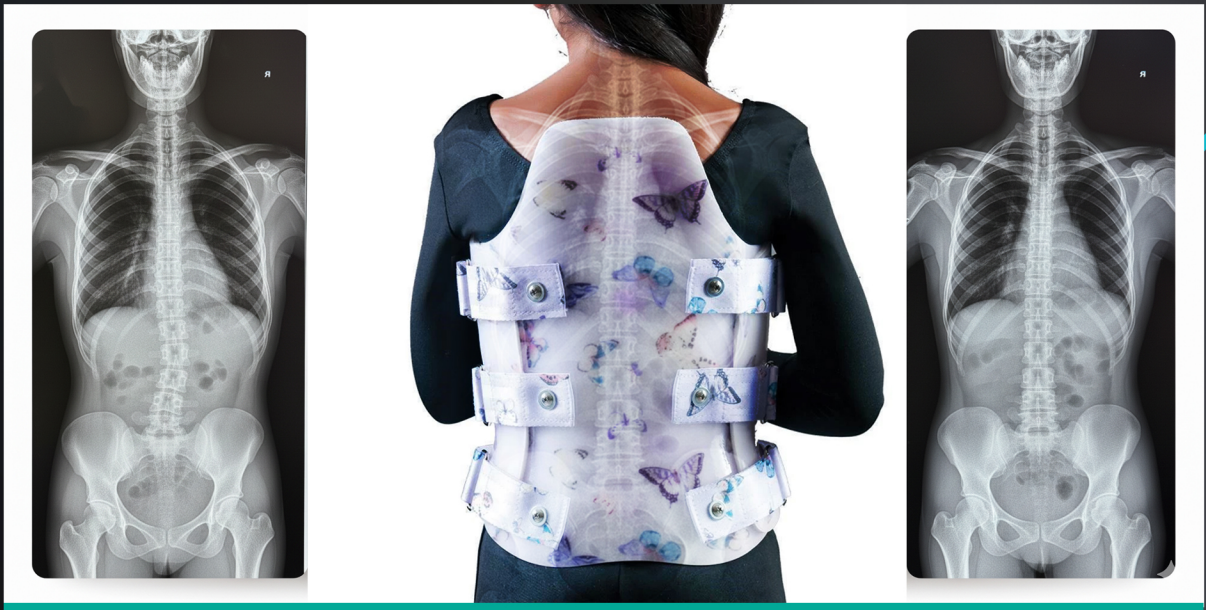

Miami TLSO 464

BOSTON BRACE

GUIDING THE SPINE. PROTECTING THE FUTURE.

The Boston Brace is a custom-made spinal orthosis designed to support and stabilize the spine in individuals diagnosed with scoliosis. Carefully fitted to each patient's body, it applies precise corrective pressure to prevent the spinal curve from progressing during growth.
It is worn discreetly under clothing, allowing patients to continue their daily routines with confidence.

Before After

Designed for comfort and confidence

- Lightweight, durable medical-grade material
- Custom-fabricated for precise fit and effectiveness
- Low-profile design for discreet wear under clothing
- Adjustable for growth and long-term use
- Easy to wear and remove

How it helps

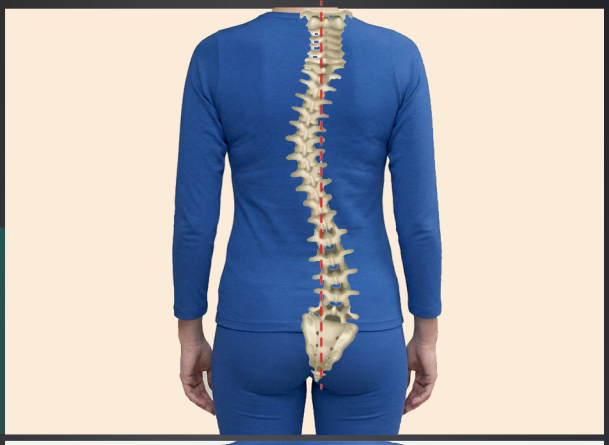

- Controls and prevents worsening of spinal curvature
- Supports healthy spinal alignment during growth
- Reduces the need for surgical intervention
- Promotes balanced posture and physical stability
- Enables safe, active, and independent daily life

Osteon. PROSTHETICS AND ORTHOTICS

SCOLIOSIS BRACE RECOVERY PROGRESSION

STEPS TO CORRECT SCOLIOSIS WITH A BRACE

Scoliosis

- Abnormal S-shaped curvature of the spine.
- Causes back pain, uneven shoulders and hips.
- Imaging confirms scoliosis diagnosis.

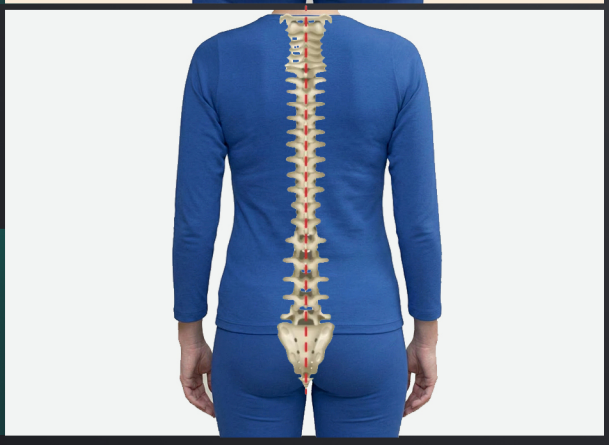

Scoliosis Brace

- Custom-fitted rigid brace is applied.
- Brace corrects spinal curvature over time.
- Brace worn for most of the day, as prescribed.

Improving

- Regular brace wear gradually reduces spinal curve.
- Spine begins to straighten with brace support.
- Follow-up visits to monitor progress.

Healthy

- Spine is corrected to a normal, straight alignment.
- Brace is no longer needed as spine is stable.
- Regular check-ups ensure long-term results.

PROSTHETICS AND ORTHOTICS

OSTEON FOR KIDS

PEDIATRIC ORTHOTIC SOLUTIONS

Osteon for Kids offers safe, comfortable, and child-friendly orthotic solutions that support healthy growth and development. Each device is carefully fitted to provide gentle correction, better alignment, and improved mobility.

Cranial Orthoses

Custom-made helmets designed to guide head shape safely and comfortably during early development.

Pavlik Harness

Pavlik Harness (for DDH)
Supports proper hip positioning to aid healthy hip development in infants.

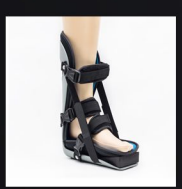

Denis Browne Splint

Helps maintain corrected foot and leg alignment during early growth stages.

Hip Abduction Brace

Hip abduction braces provide stable hip support for safe positioning and improved comfort.

Night Splints

Supports correct positioning during sleep to improve flexibility and alignment.
